

Hydrogen is a poor man he has only one electron. Chlorine is a beautiful and pretty girl who has many electrons but she is greedy . She wants more !! One day she met with hydrogen .Hydrogen fell love with Chlorine. He said Chlorine ,” Will you be my girlfriend ? I will give you my electron.” Chlorine needs more electron because she is not satisfied with his 7 . So she takes electron and makes 8 where Hydrogen makes 2 . He is happy to get 2. He is not as ambitious as Chlorine. Chlorine has three sisters named Florine ,Bromine and Iodine . They are just like Chlorine. One day Potassium and Sodium were walking on the park where Hydrogen and Chlorine were gossiping. Sodium and Potassium both liked Chlorine and went to her. They told Chlorine to marry one of them . Chlorine said ,”How many brothers do you have?”. Potassium said ,”We are 7 brothers . Hydrogen,Lithium,Sodium,Potassium,Rubidium,Cesium and Francium. Hydrogen is not like us , He has one electron like us but he is poor. We have more .” “Then,who is more rich ? Sodium or Potassium?” ,chlorine asked . Sodium said,” I am weaker than Potassium but I love you too much.” Then chlorine laughed and said,” I have a future ,I could not spoil my future with you , Sodium. I love Potassium .” Hydrogen was hearing their conversations . He was so sad and said,” I loved you so much but you leave me . You won’t be happy. You have to change your boyfriend many times .” Hydrogen became so sad .His heart was broken . He went to his brother another hydrogen . They decided , they will leave home together and share their electron to each other . But still they are finding new girlfriend . If they get new girlfriend like chlorine or carbon ,they’ll leave each other.”

In the next episode we will tell about the playgirl Carbon.
